About Me:

I enjoy working with small start-ups to develop new and emerging technologies that can positively impact our society. I have a knack for keeping fast-growing companies organized and process driven.

Skills (various levels)

Ruby	Rails	JavaScript	jQuery
HTML	CSS	Rack	Sinatra
Grape	Minitest	Rspec	Git
BackBoneJS	EmberJS	AngularJS	API
AWS	MySQL	PostgreSQL	Dynamo DB
TDD	BDD	BPM	

And most importantly the ability to learn new skills very quickly. :)

Experience

FULL STACK DEVELOPER (CONTRACTOR), TAROKO SOFTWARE – 12/14 - 05/15

Technologies: JRuby, Rails, JavaScript, PostgreSQL, Liquid, Aspose Java module

I developed a rails application using JRuby, Liquid markup and Aspose to create custom legal documents. I worked with the designers and front-end engineer to create a smooth application flow.

FOUNDER / DEVELOPER, SPEXIE – 01/14 - PRESENT

Technologies: Ruby, Rails, JavaScript, PostgreSQL

I created a software development services company to design, architect and build web applications using popular languages and frameworks. I helped re-architect an outdated and convoluted Rails application for a profitable company based in Brazil.

CO-FOUNDER / DEVELOPER, SUBLEDGER, INC. – 04/12 - 01/14

Technologies: Ruby, Rack, Grape, EC2, SQS, DynamoDB, Celluloid

I had the privilege of collaborating on the design and development of potentially the worlds most highly scalable accounting API. My skills as a developer grew exponentially while working with some of the greatest people in tech.

BUSINESS DEVELOPER, NOVA TECHNICAL CONSULTING – 08/11 - 04/12

Technologies: SugarCRM, JIRA, Confluence

Create business processes and tracking / traceability within the organization. Expand service offerings and improve efficiency in the company. Implement a BPM solution to track projects, assets, time management, etc.

PROJECT MANAGER, ENGINE YARD, INC. – 07/06 - 07/09

Technologies: Custom developed PBX, SalesforceCRM, Confluence

As an unofficial co-founder I helped the company grow in many areas such as business operations, data-center operations, customer service and sales, hiring and team development, etc.

I focused on identifying business operational problems, researching and managing implementation of solutions.

- ERP and CRM Systems
- PBX Systems
- Process driven business automation

PROJECT MANAGER, QUALITY HUMANS INC. – 06/03 - 10/07

Technologies: TeamTrack, Custom CRM

Co-managing IT projects and building client relationships.

IT resource recruiting and management.

Business Process Consulting.

- Numerous government and private sector BPM consulting to include the Office of the Secretary of Defense (OSD) and Executive Information/Decision Support (OSD)
- Business Development & Customer Relations

Education

MTI SCHOOL OF BUSINESS AND TECHNOLOGY - 2000 - 02

A.A.S., Application Development

KCP INTERNATIONAL LANGUAGE INSTITUTE - 09 - 10

Advanced Level Japanese Language

MAKER SQUARE – 06/14 - 08/14

Technologies: HTML, CSS, Ruby, Rails, JavaScript, BackboneJS, AngularJS, Rack, Sinatra, Git, APIs, MySQL, PostgreSQL, Rspec, Sass, SCSS

MakerSquare is a developer boot camp where I was immersed in full-stack development technologies and projects over a course of 3 months.
